

## **Idera Pharmaceuticals Announces IMO-2125 Data Presentation at the 46th Annual Meeting of the European Association for the Study of the Liver**

March 8, 2011 1:05 PM EST

CAMBRIDGE, Mass., Mar 08, 2011 (BUSINESS WIRE) --

Idera Pharmaceuticals, Inc. (Nasdaq: IDRA) today announced that data from its Phase 1 clinical trial of IMO-2125, its novel immune modulator for the treatment of chronic hepatitis C virus (HCV) infection, in treatment-naïve genotype 1 HCV patients will be presented at the 46th Annual Meeting of the European Association for the Study of the Liver (EASL) being held March 30 - April 3, 2011 in Berlin, Germany. The presentation entitled "IMO-2125 plus ribavirin gives substantial first-dose viral load reductions, cumulative antiviral effect, is well tolerated in naïve genotype 1 HCV patients: a Phase 1 trial," D. Guyader, et al., will be made in a poster session entitled Viral Hepatitis C: Clinical (new compounds, resistance) on Saturday, April 2, 2011. The full abstract (#1209) can now be accessed through the EASL website [www.easl.eu](http://www.easl.eu).

### **About IMO-2125**

IMO-2125, a Toll-like Receptor (TLR) 9 agonist, is a novel immune modulator being developed as a component of treatment for chronic hepatitis C virus (HCV) infection. IMO-2125 is designed to stimulate the immune system, causing the body to generate natural interferons and other antiviral cytokines. IMO-2125 has been evaluated in a Phase 1 clinical trial in null-responder HCV patients, defined as those who did not achieve a 2 log<sub>10</sub> reduction with prior standard of care treatment, as monotherapy for 4 weeks and in a Phase 1 clinical trial in treatment-naïve HCV patients in combination with ribavirin for 4 weeks.

### **About Idera Pharmaceuticals, Inc.**

Idera Pharmaceuticals develops drug candidates to treat chronic hepatitis C virus infection, autoimmune and inflammatory diseases, cancer, and respiratory diseases, and for use as vaccine adjuvants. The company's proprietary drug candidates are designed to modulate specific Toll-like Receptors, which are a family of immune system receptors. Idera's pioneering DNA and RNA chemistry expertise enables it to create drug candidates for internal development and generates opportunities for multiple collaborative alliances. ### **Idera Forward Looking Statements**

This press release contains forward-looking statements concerning Idera Pharmaceuticals, Inc. that involve a number of risks and uncertainties. For this purpose, any statements contained herein that are not statements of historical fact may be deemed to be forward-looking statements. Without limiting the foregoing, the words "believes," "anticipates," "plans," "expects," "estimates," "intends," "should," "could," "will," "may," and similar expressions are intended to identify forward-looking statements. There are a number of important factors that could cause Idera's actual results to differ materially from those indicated by such forward-looking statements; whether results obtained in preclinical and clinical studies such as the studies referred to in this release will be indicative of results obtained in future clinical trials; whether products based on Idera's technology will advance into or through the clinical trial process on a timely basis or at all and receive approval from the United States Food and Drug Administration or equivalent foreign regulatory agencies; whether, if the Company's products receive approval, they will be successfully distributed and marketed; whether the Company's collaborations will be successful; whether the patents and patent applications owned or licensed by the Company will protect the Company's technology and prevent others from infringing it; whether Idera's cash resources will be sufficient to fund the Company's operations; and such other important factors as are set forth under the caption "Risk Factors" in Idera's Quarterly Report on Form 10-Q for the three months ended September 30, 2010, which important factors are incorporated herein by reference. Idera disclaims any intention or obligation to update any forward-looking statements.
