About Idera Pharmaceuticals, Inc.

Idera's proprietary technology involves creating novel nucleic acid therapeutics designed to inhibit over-activation of Toll-like Receptors (TLRs). Idera is developing these therapeutics for the treatment of genetically defined forms of B-cell lymphoma and for autoimmune diseases with orphan indications. In addition to its TLR programs, Idera is developing gene silencing oligonucleotides that it has created using its proprietary technology, to inhibit the production of disease-associated proteins by targeting RNA.
